## Exhibition and Sponsorship OPPORTUNITIES

### The 34<sup>th</sup> IEEE International Symposium on Power Semiconductor Devices and ICs (ISPSD2022)

### Celebrating 34 Years of Excellence in Advancing Power Semiconductor Technologies

ISPSD is the world's premier forum for technical discussion in all areas of power semiconductor devices and power integrated circuits including wide band gap and silicon device physics, modeling, design, fabrication, materials, packaging, device reliability, and device/circuit interactions. With an annual attendance of over 400 researchers, the conference often serves as the first venue to report the latest breakthrough device technologies before their commercial proliferation into energy-efficient power electronic applications.

ISPSD2022 will be held in scenic Vancouver cradled amid snow capped mountains and sparkling ocean and is one of the world's premier meeting and convention destinations. World-renowned cuisine and a great venue all add up to an unforgettable conference experience. Conference participants will experience a modern, cosmopolitan city that blends culture and landscape.

A three-day exhibition will be held in association with the Symposium to offer a unique opportunity for exhibitors to showcase their products and services closely associated with the power semiconductor industry. Corporations and other organizations are also invited to support the Symposium. Support will be acknowledged in conference publications as well as signage at the venue commensurate with the level of sponsorship.
